MEW-YORK DARLY TRIBUXE SATURDAY, MARCH 21 13

#### THE NEW POST-OFFICE.

MKETING OF THE COMMITTEE OF COUNCILMEN YES

TERDAY. At 2 c'cleck yesterday afternoon there was a meeting of the special Committee of the Board of Councilmen appointed to hear parties in the matter of rescinding the appeared to hear parties in the matter of resenting the action of the Common Council in ceding to the United States Government the lower portion of the City Hall Fark as a site for the New Post-Office. Councilmen Hart and Gilmore were present.

Park sea effe for the New Fost-Office. Councilmen Hart Fark sea effe for the New Fost-Office. Councilmen Hart and Gissore were present.

Gen. Exorms said he took a deep intexest in this matter. He did not wish to see the City Hail Fark "stuffed up" in the manner which had been proposed. He would not take to see the lower part of the City of New-York obstructed as it andoubtedly would be if the Fost-Office structed as it andoubtedly would be if the Fost-Office was erected in the Park. He would prefer the upper part of the Fark-sny from No. 25 to No. 35 Chambers et., and on Centreet from Chambers to Reades-it, from No. 1 to No. 15. He thought those lots would be desirable for the Post-Office site. Elm-st. could be easily opened for foot passengers, if the site crossen should be on Chambers-st. The larger proportion of the Western traveling public come directly from site closen should be on Chambers-St. The larger propor-tion of the Western traveling public come directly from the New-Jersey Railroads toward the City Hall Park. If the Post-Office should be erected at the point he desired, then we would have the new Court-House, the Post-office, and the newspaper offices in close proximity. Simes, had only a mass of rookeries creeted upon its kine, and of course these were no ornaments to the city. Mr. G. W. Pell read the following: "The interest Jately excited in the public mind with regard to the selec-tion of a site most eligible for a Post-Office, has induced several needings to be held by the Committee for the estion of a site most eligible for a Post-Office, has induced several meetings to be held by the Committee for the es-syession of public opinion. It is much to be regretted that so few individuals have availed themselves of op-pergunities presented for the expression of their views both in favor of and in opposition to the project. The site at present proposed is deemed unsuitable for the follow-bur reasons.

ing reasons:

First: The shape of the plot is entirely objectionable for the erection of a building with reference to architec-

tural design.

"Second: The sale of the ground to the General Government at less than one-fifth its actual value.

"Third: No more objectionable situation could possibly to chosen for holding courts in the City of New-York, in consequence of the noise occasioned by vehicles of every

consequence of the noise occasioned by vehicles of every description.

Fairth: The crowded state of the theroughfare at this particular point renders it dangerous and almost unapproachatele; and

Fifth: The additional obstruction to the locality by

"Fifth: The additional obstruction to the locality by mail wagons constantly arriving and departing.
"These are sew of the many objections which might be arged against the present selection. As I stated on a foruser occasion, I am of opinion that the present City Hall could be easily converted into a Fost-Office, and the proceeds of such sale to the General Government could be appropriated to the erection of a new City Hall in Madison-square. It will not be many years before the rapid increase of population will eventually call for the erection of a building in that locality."

After some general conversation the Committee adjourned, to render their report to the Board at an early day.

#### CITY ITEMS.

MIDNIGHT MISSION .- A sermon upon the subject of the Midnight Mission will be preached in the Church of the Incarnation, Madison-ave., corner of Thirty-fifth-al., on Sunday evening, by the Rev. Dr. Muhlenberg.

DETENTION OF THE STEAMER MERRIMAC .- The Brazilian steamer Merrimae will be detained here until soon of Sunday, in consequence of the detention by the gale of the Mariposa from Fortress Mouroe with 160 brazilian emigrants on board.

ALLEN-ST. PRESBYTERIAN CHURCH .- An unusua religious interest has prevailed since the beginning of the year in the Rev. Dr. Newell's Church, Allen-st., and 140 persons will be received into the church to-morrow afternoon.

MEETING OF THE GENERAL COMMITTEE .- A meeting of the Union Republican General Committee will be held at Argus Hall, No. 600 Broadway, this evening, for the purpose of making suitable arrangements for the funeral of its late President, Amor J. Williamson.

MINERAL CABINET .- At the rooms of the Society for the Advancement of Science and Art, in the Cooper Institute, is a very interesting cabinet of minerals from the Pacific coast, comprising over 400 specimens of the products of California and Oregon. It is open free to the

Sons or Temperance.-A new Division of this Order was instituted yesterday, in the lecture-room of the Central Presbyterian church, the Rev. J. B. Dunn, pastor, by J. N. Stearns, M. W. P., with 40 charter members. This Division is composed of some of the best men in the city, including officers in several of the principal churches, merchants, bankers, editors, &c. Among its efficers elected are the Hon. William E. Dodge, W. P.; the Rev. James B. Dund, W. A.

dispatch received here yesterday, we learn that Mr. F. X. Harman of this city was on day before yesterday unani mously elected Mayor of the City of Buda (Ofen), his mative place. Mr. Házmán was one of the leaders of the Hungarian revolution of 1849, and a member of its provisional government. After the defeat of the revolutionary movement, he was condemned to death, but escaped and came to this country, where he in due time became a citizen, and has been a staunch advocate of liberal and radical principles. He will now, as we understand, obey the call of his countrymen, and return to the land of his birth as the first magistrate of its ancient capital.

PAYMENT OF BOUNTIES TO SOLDIERS .- Gen. C. W. Darling, Engineer-in-Chief, headquarters No. 544 Broadway, is now receiving Paymaster's checks on the Assistant Treasurer of New-York, for the purpose of paying the ant Treasurer of New-York, for the purpose of paying the additional bounty allowed by Congress to those soldiers who enlisted before the \$500 bounty was given by the Government. The men who are now receiving their bounty through Gen. Darling, are those who belonged to the following named regiments: 1st New-York Dragoons, 2d New-York Cavalry, 3d New-York Artillery, 16th New-York Artillery, 16th New-York Artillery, 16th New-York Volunteers, 150th New-York Volunteers, 150th New-York Volunteers, and a few from \*the 10th, 1sth, \$and 17th Connecticut.

NEW ROOMS FOR THE COURT OF APPEALS.-Upholsterers are now engaged in fitting up the spacious rooms on the ground floor of the left wing of the New Court-House for the use of the Court of Appeals. The entrance to the court-room will be through the eastern section of the Park. The term of the Court will commence in a few days, and owing to the short notice given to the Superintendent of the New Court-House it was found impossible to prepare har, the least rooms on the main story for the use of the Court. The room which is being prepared is 45349 feet, and will accommodate about 200 persons. Two thirds of its entire dimensions have been inclosed for the bar and the bench, and on the outside are three rows of elevated seats for spectators. The furniture is all arranged, and it only remains to finish a damask screen for the bench to complete the room.

CONDITION OF THE STREETS .- At 12 o'clock m. yesterday, the Street-Cleaning Commissioners held a smeeting in the Mayor's Office, all the members present The report of Dr. Moreau Morris, Sanitary Inspector, made to the Board of Health, as to the filthy condition of certain streets in the upper part of the city, was read.

Mr. Thomas N. Carn Superintendent under the Street-Clending Coutractor, ex-Judge Whiting, read to the Commission his own affidavit denying the statement of Dr. Morris as to the filthy condition of the streets referred to, and claimed that they were in a very clean condition. Mr. Whiting read the affidavit of Mr. Perry, one of his clerks, who, in company with the Contractor, had made a personal inspection of the streets complained of, which stated that the streets were clean. The Commission then appointed three inspectors, and directed them to proceed at once to the inspection of the streets referred to by Dr. Morris, and report the results of their havestigation to the Commissioners on Monday noon next. The Commission then adjourned. made to the Board of Health, as to the filthy condition of

MEETING OF TENANTS IN THE TWENTY-SECOND WARD .- A meeting of the tenantry who inhabit the ement houses of the Twenty-second Ward was held ast evening at Washington Hall, on Eighth-ave., to excast evening at Washington Hall, on Eighth-ave., to express their instantation at the exerbitant prices charged for apartment: by the laudlords. The latter were demounced in unmeasured terms as trying to oppress the poor man by crowding him into cellars and getrets. One of the speakers told the meeting that it was their own facet that the iron heel of oppression was on their necks. They had been nursed up in the cradle of Democracy and waste ased to vote for any persons that were nominated who would always forget them when they arrived at the Legislature. Sanitary Inspectors would inspect their apartments and submit reports, stating that they were evererowded, but there was no remedy. They were advised to combine and select men who would look after their interests by making laws that would restrict avarsicions landlords.

UNION LEAGUE MEETING .- A meeting of Council No. 19 of the Union League was held at Argus Hall, No. 600 Broadway, yesterday evening. Quite a number of doo Broadway, yesterday evening. Quite a number of ladies were present. The Chairman, Mr. Wm. V. Alex-ander, on taking the chair, said this was the first of a series of open meetings intended for the advantage of series of open, meetings intended for the advantage of persons outside of the Order, especially the ladies, to whom the objects and practical operations of a society otherwise secret might be explained. The Union League of America sprung into existence in the early days of the Rebellion, its first inception being among the mountains of East Tennesses, where it was unsafe for a Union man

to express his sentiments. From the Border Slave States it was brought into the loyal North, and has accomplished much for the preservation of the Union. Its members were still doing a good work, and here in these open meetings their wires and daughters would learn to appreciate the work their husbands and fathers are doing and have done in the councils of the Order. Short addresses were then made by Nathaniel Appleton and Douglas Campbell, eags, the former discussing the relations of States to the Union and the latter the policy of inspeachment. Gen. Thomas M. Bite of Kentucky also made a short address.

WHISEY AND TOBACCO FRAUDS.—It is charged by the members of the Metropolitan Police that whenever they have informed the afficers of the Internal Revenue, in certain districts in this city, of frauds which the manufacturers of whisky and tobacco were percentains, the revenue men professing to have just made the discovery themselves, have taken all the money accruise from confiscation, and given the Police nothing. This sharp practice hashroughtour policemen to the conclusion that it is best not to waste their time in doing the revenue efficeers' work, and the result is that hundreds of private stills are in operation in garrets, cellars, and out-of-the-way nooks and corners, and in one Ward a large distillery sends out, at night, after the Government watchmen have gone to their homes, hundreds of gallons of whisky, upon which no tax is received by the Government. Previous to the imposition of the fax upon manufacturers of to-bacco, it was not unusual tofind a half-filled eigar-box on a retailer's counter; but the smoker of to-day nearly always selects his "Havana" from a full box, and no matter how offen he may go to the box, the vender will always have it full. Small manufacturers make these fragrant "Havanas" at home and take them in pocketfulls to the retailers; the cigars are deposited under the counter, and tossed into the customers' box as often as may be convenient. These abuses of the Revenue law might be remedded if the officers of the Revenue and of the Police could or would work together. they have informed the officers of the Internal Revenue,

THE CATTLE PLAGUE .- Dr. Rufus King Browne delivered a lecture last evening at the rooms of the Society for the Advancement of Science and Art, in Cooper Union, upon the Cattle Plague; its history, its pathology, and its arrest. He said, the eatife plague has existed since the flurd century. It is more destructive to horned beasts than others. During the middle ages it frequently devastated England. In the period between 1707 to 1714 it swept fearfully through Western Europe. Rinderpest is a disease among cattle similar to small-pex among mankind. Its course is brief, frequently terminating after 24 hours without any external appearance of its presence. It is brought on by green food. The appetite lessens, the animal does not like the pail clean, as is usual, but leaves the meal which it contains. A thick mucons fluid flows from the mose and eyes. These are the symptoms. It is contagious, Inocculation kills the animal, Bogs, sheep, and even chickens carry with them the dreaded virus from one barn yard to another. The disease was carried into Austrin by one single ox. In Hungary it kills 63 per cent of those attacked, but in England upward of 90 per cent are lost. Centuries have taught that the only means for stamping out the pest is slaughter. One hundred and twenty years have elapsed since the last course of cattle plague. Prof. Browne then described rinderpest, by diagrams, as developed by microscopic research, and said that copious sprinkling of carbonic acid seems to be the only effectual mode of preventing the continuance of the plague. pathology, and its arrest. He said, the cattle plague has

THE CONVENTION OF IRISH SOCIETIES .- The Convention of Irish Societies met last evening at Hibernian Hall. No. 42 Prince-st., the regular officers presiding. mian Hall. No. 42 Primee st., the regular officers presiding. The Secretary announced that the Convention, during the nine meetings it had held, had received from the different Societies constituting the organization the sum of \$335. Of this \$170 was paid for advertising, printing of programmes, &c., and \$72 for the rent of the hall. A communication was freelived from the Sisters of Charity, requesting a donation for the poor under their care. The Chairman stated that the question would be considered when last year's business was in the city, including officers in several of the principal churches, merchants, bankers, editors, &c. Among its efficers elected are the Hon. William E. Dodge, W. P.; the Rev. James B. Dund, W. A.

Bodies Recovered.—The bodies of Frank and Alfred A. Seigler, aged respectively 13 and 16 years, who, with James, a brother of one of the above, were drowned on Saturday evening by the upsetting of a boat while rowing across the North River to Hoboken, have been recovered. The body of Frank was conveyed to the residence of his parents, No. 311 West Twenty-futh-st., and that of Alfred to the residence of his parents, No. 328 West Twenty-fourth-st., where Coroner Widey yesterday held an inquest. Search is now being made for the other body.

Personal.—Count d'Espenille, Viscount Clay Viscount d'Sauvuer, and Marquis de Gallefet, arrived in tewn yesterday from Mexico, en route to Paris, and are stepping at the Brevort House. Senator Evans of Colorado, and Gen. E. W. Leavenworth, Syracuse, are at the St. Nicholas Hotel. Professor R. G. Eastman, Poundand Col. N. Bowen, U. S. Engineers, are at the Et. Nicholas Hotel. NEW-YORK SUNDAY SCHOOL INSTITUTE.-The fifth and final Session of the New-York Sunday School Institute was held fast evening at the Reformed Dutch Church. corner of Twenty-ninth-st, and Fifth-ave. The devotional exercises of the evening were conducted by the Rev. T. W. Chambers, D. D., and addresses were delivered by the Rev. J. H. Vincent, on "Teacher Training;" by N. A. Calkins, esq., on "The Secular School and the Sunday School," and by R. G. Pardee, esq., on "Teachers' Mechings." The closing address was made by Dr. R. J. W. Buckland. The object of the meetings, which during the present week have been nightly held at this Church, was to promote and foster the growth of Sunday Schools and improve the conduction of teachers and pupils, and to attract toward the schools that attention which the members of the Institute deem necessary to their proper maintenance. The chief drawback in the working of Sunday Schools, as spoken of by members of the Institute, is the lack of proper training in the teachers. The address of the Rev. J. H. Vincent touched especially appon this point. The Sunday School being the school of discipline for the young christian was of at least equal importance with the Church, and he considered that labor in the Sunday School was the highest form of Christian effort. To reclaim those young people who have just graduated from parental authority and shuu the Sunday School, it is necessary to bring into effect the moral, spiritual, and intellectual force, and these qualities can only be commanded by a trained teacher. If the teachers were properly trained the pupils would cease to regard the Sunday School sessions as irksome, and attendance at the classes would become more regular. He thought that in all theological institutions, a Sunday School Curriculum should be established, in which candidates for the Ministry might be instructed in Sunday School teaching, for it detracted nothing from the dignity of a pastor to be a thorough working Sunday School man. This had already been done in one "stance, and he also knew of a young ladies" Seminary where ""branch had become a matter of especial study. In New-York an Institution bearing the title of th corner of Twenty-ninth-st. and Fifth-ave. The devotional exercises of the evening were conducted by the Rev. T.

nearly 1,500 people present. MURRAY HILL EDUCATIONAL INSTITUTE .- At meeting on Thursday evening of the Special Committee which was recently appointed by the Association for the Advancement of Science and Art, to take into consideration a proposal to establish in this city a school for young women, in which physical and mental training shall be combined. Dr. John H. Griscom was called to the Chair, and remarks were made by Prof. Dwight of Columbia College, Dr. J. V. C. Emith, ex.Mayor of Boston; Dr. S. W. Butler of Philadelphia; Dr. E. P. Baoming, Dr. Joseph W. Richards, Messrs. Henry O'Reilly, E. M. Barraun, R. H. Williams, R. L. Dugdale, Parigot, Wilcox, J. Disturnell, and Sinclair Tousey. The Rev. Howard Crosby sent a letter of apology, and added the following: "I have long felt very deeply the need of this movoment. Our women are fast becoming mere butterfiles for want of a true training. Most of our female schools are fashionable hot-kouses, to encourage the growth of listiessness, affectation, and extravagance. Society is made artificial, the laws of God are despised, and all things set topsytury. Wives lord it it over their husbands, and children lord tover their parents; wisdom is driven into the corner, and folly wears the crown. I trace nine-tenils of the flippancy and falsehood of modern society to the mockery of an education whick the daughters of the tand receive. God help you and your colleagues in this good work to send the devil yelping to his den." Dr. Griscom informed the meeting that a gentlefan who was in youth a teacher owns a large shafe of the block which is situated on the crest of Murray Hill, and bounded by Lexington and Third-aves. and Thirty-sixth and Thirty-eventhate, and has induced the other owners to selling the entire block to an educational association, the understanding being that the purchasers shall erect suitable buildangs, wherein physical and intellectual culture shall be comeined in the education of our young women. The land may be purchased for 859,000, and it is understanding being that the purchasers shall erect suitable buildangs, wherein physical and intellectual culture thall be comeined in the sound of Education, and adjourned to 8 o'cloc Advancement of Science and Art, to take into consideration a proposal to establish in this city a school for young

#### THE GOLD PEN-BEST AND CHEAPEST OF PENS. MORTON'S GOLD PENS.

THE BEST PENS IN THE WORLD. For sale at No. 25 MAIDEN-LANE, New-York, and by every duly-appointed Agent at

Morton makes no Pens stamped with the Name or Trade-mark of any other; therefore, where an Agency is established, the public will be best suited, and at the same prices, by calling on the Agent; in all other places those wishing the Morton Pen, must send to Headquarters, where their orders will receive prompt attention, if accompanied with the cash.

WHO MAKES THE BEST AND CHEAPEST GOLD PENS!

It is the trade-marks of the prosperous and deserving that rogues find their account in forging, and articles of unusual and acknowledged merit that imitators exhaust their ingenuity in copying. The best metallic pen ever invented is Alexander Morton's. Nature made a suggestion when she provided goose-quills, which Morton accepted and carried out in gold. The penalty follows, and men, without the ability to make an honest living, steal his name and reputation to cheat the public with a spurious article. There are pens, and Morton-pens, and the rogue knows that if he can persuade the people who write and don't scratch merely, that that which he can make is the same thing as that which he cannot, he is on the high road to fortune. It is a simple proposition-to pass off one pen for another. Some resort to even a simpler process. One knave issues a circular, signing Morton's name with other initials, in which he promises a pen for a remittance in money. The dupe sends the money, cheated by the stolen name, but gets nothing in return. Perhaps he seeks fer redress at the place whence the circular assumes to come; but no such place can be found, and he puts up with a dead loss. Or the same circular is sent out with another signature; but the result is the same; the price is paid, but no pen is returned. Morton's reputation thus becomes an article of trade in the rogues' market; its real owner is defrauded, and multitudes made the victims of knavery. Oftener a spurious article is sold for the real Morton pen, in which case the reputation of the inventor suffers still more, and the purchaser, though he gets something for his money, has a poor thing where he hoped for a good one, in the existence of which he no longer believes. Mr. Morton proposes to protect himself and

the public. In his published Card he announces that Menceforth his pens will only be sold at his own place, No. 25 Maiden-lane, and by his authorized agents. These agents will all be provided with a large and conspicuous certificate of authority to sell, and the pens cannot be bought of anybody who cannot show one. Here-after nobody need be cheated, and everybody | H. W. BENTON & Co., NEW YORK, NO. 247 AND 249 WASHINGTON ST., NEW YORK, INVITE ATTENTION to their IMPROVED CHEWING TOBACCO.

THE AMERICAN BUSINESS COLLEGE of who wants the best of pens can buy them of the agents at the manufacturer's prices, with the certainty that the article paid for is the article they meant to buy .- [New-York Daily Tribune.

> MORTON'S GOLD PENS .- Mr. Morton, the successful maker of the best gold pens in the world, publishes a business card announcing a change in his system of selling to dealers. He now sells the Merton pen at wholesale to nobody but duly appointed and authorized agents, who are required to sell to the public at Mr. Morton's published rate of prices. This arrangement will secure to every principal town an authorized agent who will have a full and varied assortment of these justly famous pens, so that the purchaser can have a far wider range of selection than heretofore, when every large town has had several dealers offering limited and indifferent samples of this pen, and often at unfair prices. We have on other occasions stated our opinion of Morton's gold pens. They are beyond comparison the best. The maker's system of machinery, too, by economizing labor, enables him to put upon the market a pen of purer gold, and far better make, than any others, at prices much less, in proportion to quality and make, than these of any other manufac-[Hartford Daily Times.

> MORTON'S GOLD PENS .- We have used many gold pens, and like those made by Mr. A. Morton, of No. 25 Maiden-lane, far better than any others we have ever tried. We have used no other for a long time past. No better gold pen [American Agriculturist. is made.

MORTON'S FIRST QUALITY.

These Pens are 16 carats fine, and are pointed with the very best Iridosmin Points, carefully selected, and none of this quality is sold with the slightest imperfection which skill and the closest scrutiny can detect.

Every Pen is stamped "A. Morton, First Quality," and numbered. The Points are warranted for mx months, except against

accident.

The Cases are made of Coin Silver, and for this quality are extra heavy and strong.
